Middlewares

cors | Graphql | ...

Express

Node

Typescript -> Javascript

+

Run my javascript

```
"scripts": {
"compile": "tsc",
"start": "npm run compile && nodemon ./dist/src/index.js"
},
```

CROSS ORIGIN RESOURCE SHARING

React - http://localhost:3000 — CORS → GraphQL Server localhost:4000

Enable cors at server side

Node + GraphQL ↔ ORM - Mongoose [Schema - Model] ↔ MongoDB → On Premise (Machine) / Cloud (Atlas)

MongoDB → Atlas (Cloud)

MongoDB → Mac → Mongo Daemon / Compass (Needs to install seperately) / Mongo Shell

MongoDB → Windows → Mongo Daemon / Compass / Mongo Shell (Needs to install seperately)

Mongo DB →

MongoDB

No SQL

Collections

Objects (Document)

Graphql → Query / Mutation / Subscription
